The reason most people suffer from the season decide very winter is that they do not fortify themselves during the fall. This year instead of courting trouble avoid it. Prepare your system now so that it will be in a position to resist the desents. Strengthen your lungs, tone the entire system, so that no matter what the weather may be, no matter how cold or wet or disagreeable conditions are, you will be so full of health, strength and energy that you will be able to go about your daily work at full speed. Last year thousands of people enjoyed parkling health throughout the Winter because they took malto-ferrin beginning about the first of October. In that way they were well fortified against weakness, so that when cold weather did come around they were able to go out at any time, knowing that they would not be taken down with any of the numerous complaints like grippe, that are usually sevalest in the Winter time.

The reason that malto-ferrin acts so wonderfully is that it contains just the sessatial medicinal elements that build and tone up the flody.
